

Job Description

GitLab Full Stack Pipeline Engineer

Responsibilities:

- Collaborate with GitLab customer DevOps teams to expedite the migration of application and infrastructure assets to the GitLab Platform.
- Demonstrate improvements in release frequency, lead time to deploy, and mean time to restore service, while reducing change failure and incident rates.

Technical Skills:

- Assist DevOps teams in planning, designing, configuring, and implementing GitLab projects and pipelines that cater to application software lifecycle management and production deployment in a compliant manner.
- Plan, design, and implement cloud-hosted services via GitLab pipelines and deployment capabilities.
- Understand how to develop web-hosted applications using best-in-class tooling, supporting local development through to code commit.
- Understand how to design, develop, and deploy containerised microservice-based applications hosted on Kubernetes.
- Implement solutions that meet customer control requirements, including IAM, cybersecurity, and change management.
- Design, develop, and implement GitOps-based CI/CD strategies.

Requirements:

- Experience in CI/CD implementation and support, preferably with GitLab and/or GitHub.
- Ability to build trusted working relationships with customer DevOps engineering teams.
- Analyse and translate customer DevOps team needs into viable implementation strategies, focusing on:

- Ways of working, regulatory controls, compliance, infrastructure, operations, observability, metrics, quality assurance, and broader integration requirements.
- Deep understanding of:
 - CI/CD principles and DevOps practices.
 - Application Lifecycle Management and IT Value Chain.
 - Secure Software Supply Chain.
 - GitLab ecosystem at all tier levels.
 - CI/CD best practices for modern technology domains and DevOps.
 - Containerised workload development and deployment.

Nice to Have:

- Cloud accreditation.
- ServiceNow accreditation or experience.
- Dynatrace experience.
- Secure Software Supply Chain frameworks (e.g., SLSA).
